KEEPING YOUR LINKS ALIVE!

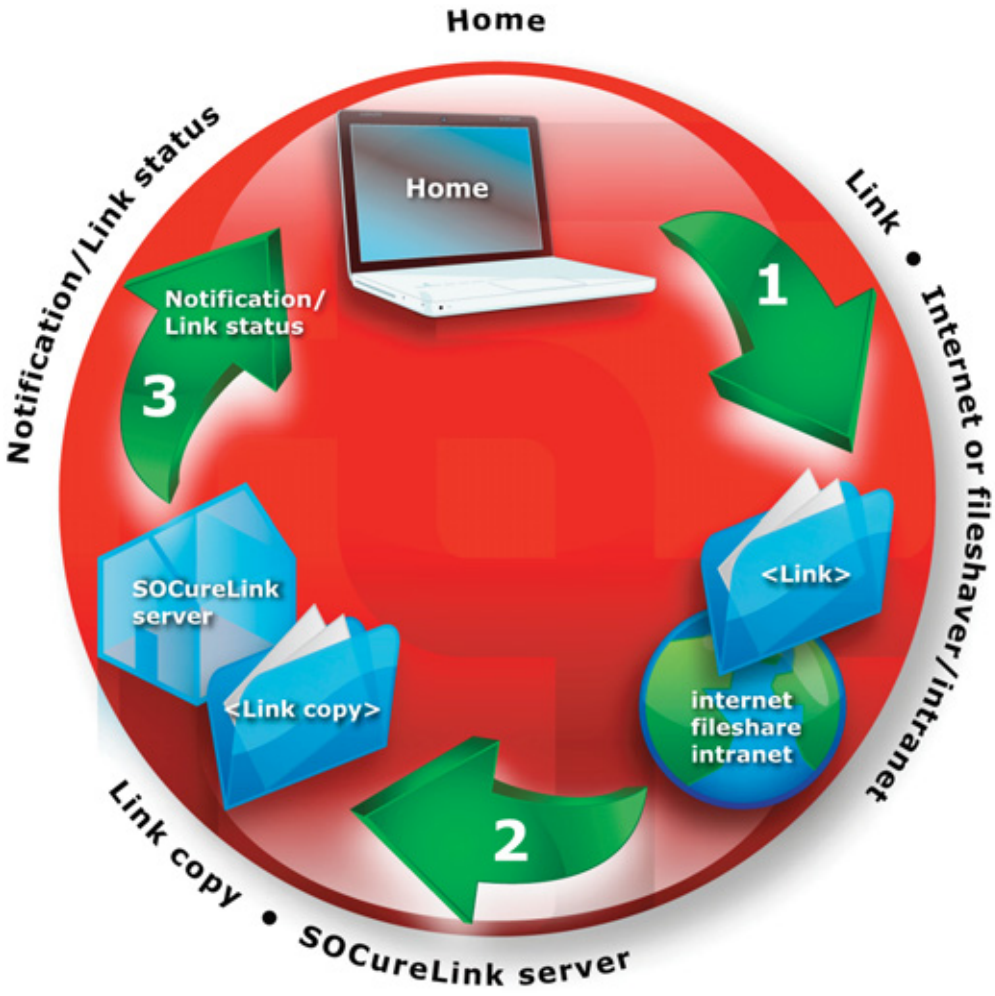
<Keeping your links alive with>

SOCureLink

Monitoring links to intra- or internet contents
Securing a local and readily available copy

Immediate benefits

- No dead links surprises
- Always a copy of the old link contents at hand
- Always aware of where used links are broken
- Ability to map document/link relationships
- Continuous cyclic check of link availability and content changes
- Ability to check throughout documents or web pages

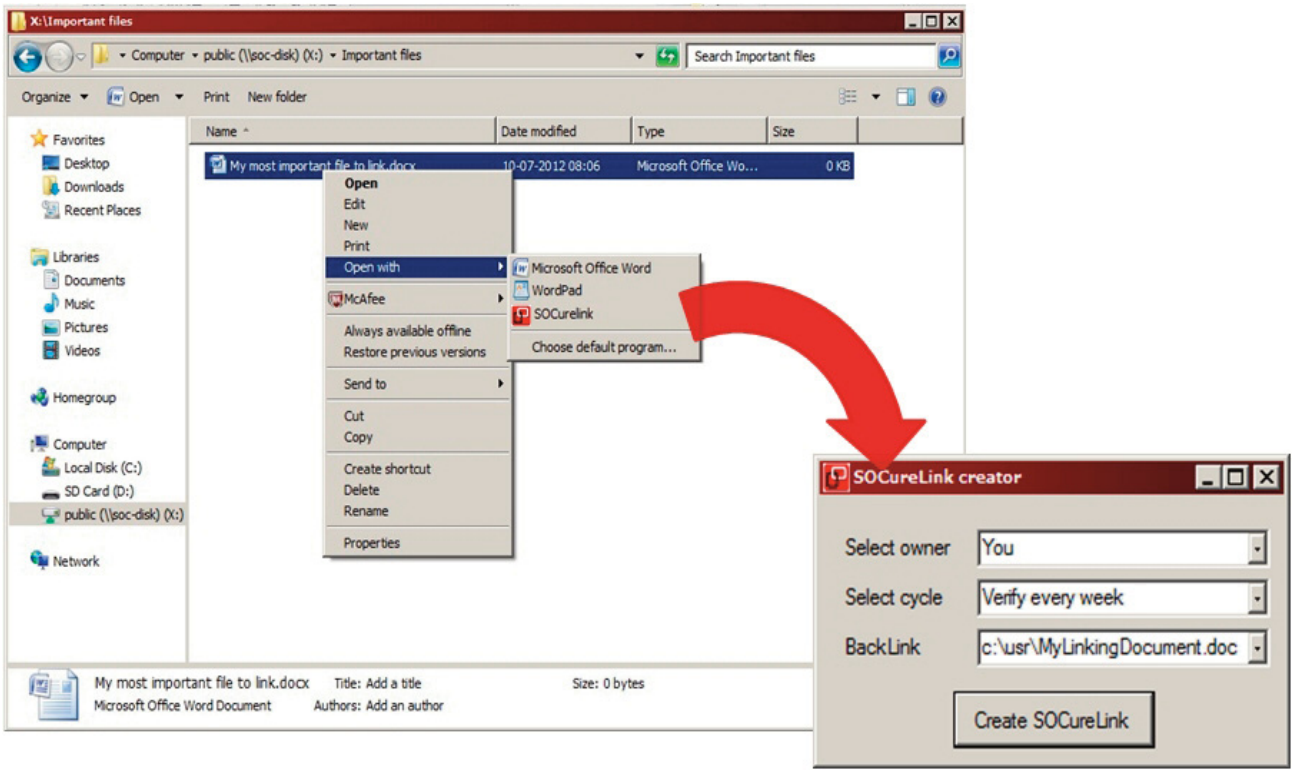


Is SOCureLink easy to use?
Easy as 123.

---

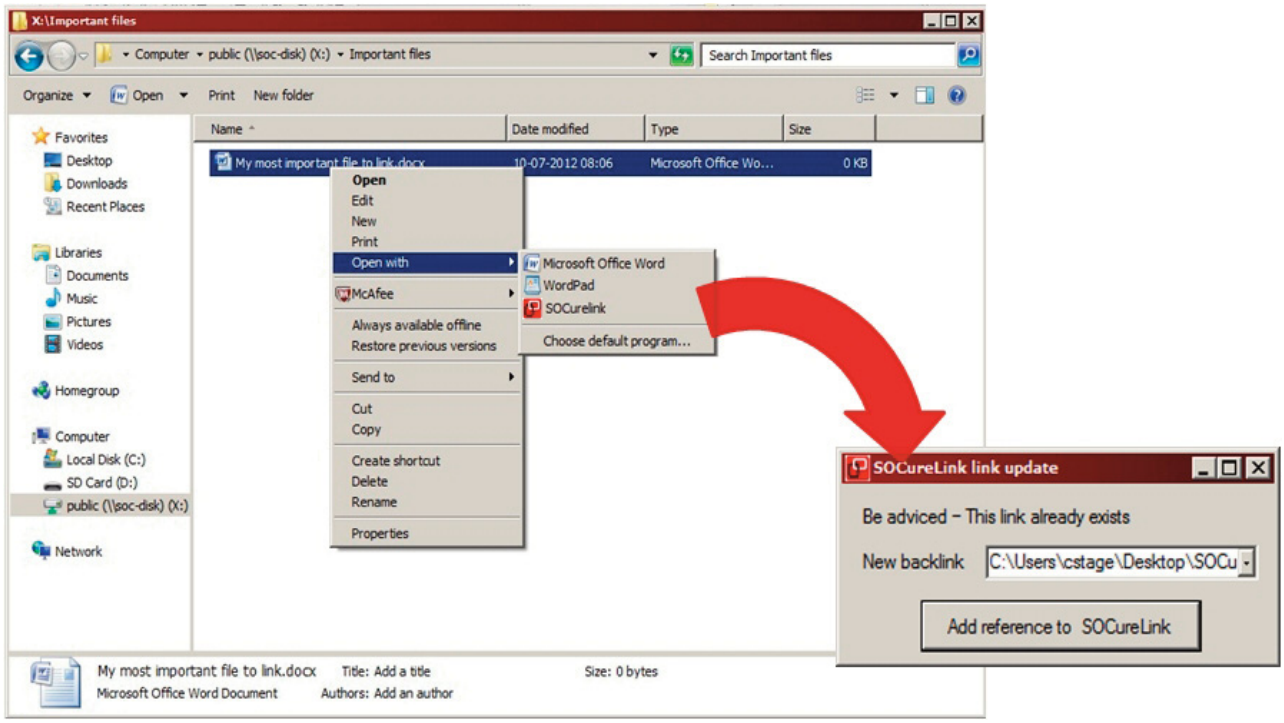
1. Create new link monitoring

- Find link (e.g. In Explorer)
- Create SOCureLink via an Explorer button
- Define link owner
- Set-up link verification cycle
- Set back-link (if not automatically known to the system)
- Press 'Use SOCureLink' (copies the link contents to a local database)



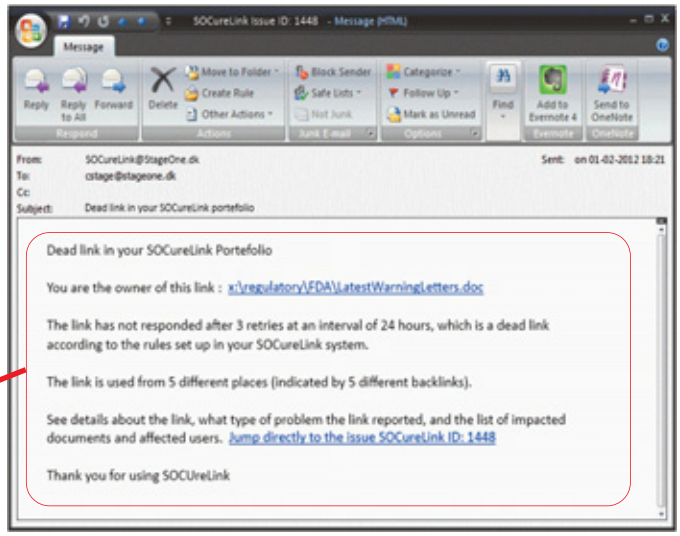
2. Re-use existing link

- Find link (e.g. In Explorer)
- Create SOCureLink via an Explorer button
- SOCureLink tells the link already exists
- Set new (extra) back-link (if not known to the system)
- Press 'Use SOCureLink' (copies the link contents to a local database)



3. Be notified

- Get notification (e.g. Interactive, via mail, via SMS or via App)
- Jump to problem
- Decide the solution
- Notify link users (where back-link is available)
- Press 'Use SOCureLink' (copies the link contents to a local database)



Dead link in your SOCureLink Portefolio

You are the owner of this link : x:\regulatory\FDA\LatestWarningLetters.doc

The link has not responded after 3 retries at an interval of 24 hours, which is a dead link according to the rules set up in the SOCureLink system.

The link is used from 5 different places (indicated by 5 different backlinks).

1 other link had the same contents as this link.

See details about the link, what type of problem the link reported, and the list of impacted documents and affected users. Jump directly to the issue SOCureLink ID: 1448

Than you for using SOCureLink
